EDITED BY [ANGELA OSBORNE](#)  
Managing Editor, *Production Machining*

Start the New Year off right by staying up-to-date with some of the latest new and improved products in the precision machining industry. Every month, we're putting together a Technology Showcase, highlighting some of the new product information that *PM* received from supplier companies. For February, we focused on [Cutting Tool Technology](#), including a unique insert clamping system, angle head tools with coolant-through design, an automatic adjustment fine-boring system, a high-speed spindle driven by coolant, and an aluminum roughing end mill.

For the latest new products across the broad spectrum of precision machining, check out Production Machining's [New Products online](#).

If you would like to learn more about the latest news, product technology and operational best practices in the precision machining industry, consider subscribing to *Production Machining's* [free monthly print magazine](#).
